iReport: Copyrights exclusively owned by Jaspersoft	
JasperReports: Copyrights exclusively owned by Jaspersoft	
Jaspersoft ETL: 2013 Talend Inc.	

1. Definitions

- (a) “Generated Code” means an independently executable program consisting of Computational Objects configured to implement a Generated Code Design.
- (b) “Jaspersoft” means Jaspersoft Corporation, an authorized reseller of the Talend Software branded as “Jasper ETL” and sold together with other Jaspersoft Software under a Jaspersoft End User License Agreement to end users (“End User” or “Customer”).
- (c) “Talend Software” means the Talend Software, in object code format. Talend Inc. (“Talend”) or its licensors retain all ownership interest in and to the Talend Software.

2. Terms and Conditions

A. A Software Subscription Key provided by Talend is required to enable the Talend Software and such Software Subscription Keys are valid only during the applicable Software Subscription Term.

B. (i) the Talend Software will, in the absence of any renewal of the Software Subscription Term, be disabled automatically upon the expiration of the applicable Software Subscription Term and (ii) the Software Subscription Key will automatically prevent the use of the Talend Software by more than the number of Authorized Users and/or Authorized CPUs, as applicable.

C. Upon activation of the Talend Software, a software module (“Use Manager”) will provide certain information to Talend regarding the system environment in which the Talend Software is operating, and will monitor the use and security of the Talend Software. For example, the Use Manager uses HTTP protocol and encryption to provide information about the Operating System, amount of RAM, type and number of CPUs and MAC address, as well as the Customer name, license type, version of the Talend Software being used, start and end date of the Software Subscription, and number of active users, provided, however, that under no circumstances does the Use Manager capture or transmit to Talend any Customer data being processed by the Talend Software.

D. Use of the Talend Software is restricted to the internal business operations of the End User. The End User may not (i) prepare derivative works from or modify the Talend Software; (ii) attempt to circumvent, disable or defeat the limitations on use of the Talend Software encoded into the applicable Software Subscription Key, (iii) transfer, sell, rent, lease, distribute, sublicense, loan or otherwise transfer the Talend Software in whole or in part (including, without limitation, Generated Code) to any third party, except as expressly permitted by the applicable End User License Agreement for the Jaspersoft Software; (iv) use the Talend Software for providing time-sharing services, any software-as-a-service offering, service bureau services, except as expressly permitted by the applicable End User License Agreement for the Jaspersoft Software; (v) alter or remove any proprietary notices in the Talend Software; or (vi) make available to any third party any analysis of the results of operation of the Talend Software, including benchmarking results, without the prior written consent of Talend. Notwithstanding the foregoing, agents or contractors (including, without limitation, outsourcers) of End Users shall be permitted to use the programs on their behalf for the purposes set forth in the End User License Agreement for the Jaspersoft Software, provided that such End Users are responsible for such agents’ and contractors’ compliance herewith and with the End User License Agreement for the Jaspersoft Software.

E. TO THE EXTENT PERMITTED BY APPLICABLE LAW, TALEND SHALL HAVE NO LIABILITY WHATSOEVER FOR ANY DAMAGES, WHETHER DIRECT, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL, ARISING FROM THE USE OF THE TALEND SOFTWARE, INCLUDING LIABILITY FOR ANY LOSS OF PROFITS, REVENUE, DATA OR DATA USE.

F. The End User, at the termination or expiration of the End User License Agreement for the Jaspersoft Software, shall discontinue use and destroy all copies of the Talend Software and Documentation.

G. The End User shall comply fully with all relevant export laws and regulations of the United States and other applicable export and import laws to assure that Talend Software is not exported, directly or indirectly, in violation of applicable laws.

H. Where the End User is an agency of the Federal Government, the following provision shall apply:

“Government Rights. The Talend Software product is "Commercial Computer Software," as that term is defined in 48 C.F.R. 2.101, and as the term is used in 48 C.F.R. Part 12, and is a Commercial Item comprised of "commercial computer software" and "commercial computer software documentation". If acquired by or on behalf of a civilian agency, the U.S. Government acquires this commercial computer software and/or commercial computer software documentation subject to the terms of the Talend Software License and Services Agreement, set forth at http://www.talend.com/legal/us_eula.php, as specified in 48 C.F.R. 12.212 (Computer Software) and 12.211 (Technical Data) of the Federal Acquisition Regulation ("FAR") and its successors. If acquired by or on behalf of any agency within the Department of Defense ("DOD"), the U.S. Government acquires this commercial computer software and/or commercial computer software documentation subject to the terms of the Talend Software License and Services Agreement as specified in 48 C.F.R. 227.7202-3 and 48 C.F.R. 227.7202-4 of the DOD FAR Supplement ("DFARS") and its successors, and consistent with 48 C.F.R. 227.7202. This U.S. Government Rights clause, consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202 is in lieu of, and supersedes, any other FAR, DFARS, or other clause or provision that addresses Government rights in computer software, computer software documentation or technical data related to the Talend Software under this Agreement and in any Subcontract under which this commercial computer software and commercial computer software documentation is acquired or licensed. Customer will not export the Products in violation of the export laws of the United States or of any other country.”

I. Talend shall be a third party beneficiary of the Jaspersoft End User License Agreement.

J. Some components of the Talend Software are third party Open Source Software and are governed by the terms of the end user license agreements applicable to such components, a list of which is set forth below:

OSS Component	Company Product	Functionality	How Used in Product	Governing OSS License (and version)
Eclipse Datatools	All products	Used to extract metadata from a Database	(1) integrated or incorporated	Eclipse Public License
Eclipse Draw2D	All products	Used to create a graphic in the job designer. Draw2D is used by GEF (see below)	(1) integrated or incorporated	Eclipse Public License
Eclipse GEF	All products	Used to create a graphic in the job designer. Eclipse GEF is based on Draw2D (see above)	(1) integrated or incorporated	Eclipse Public License
Eclipse Teneo	All Commercial products	Used until 4.0 product to store Eclipse information in our Database Metadata.	(3) statically linked;	Eclipse Public License
Epic	All products	It's a Perl editor	(3) statically linked;	Eclipse Public License
SQL Explorer	All products	It's a SQL editor	(3) statically linked;	[LGPL v2.1]
Hibernate	All Commercial products	Used to store data inside a database	(3) statically linked;	[LGPL v2.1]
CXF	All products	Used for webservice access	(3) statically linked;	Apache Software License
Jetty	Talend Integration Suite RTx	Used as an servlet container	(5) bundled or distributed	Apache Software License
Drools	Talend Integration Suite	Our Talend Rules module is based on Drools	(5) bundled or distributed	Apache Software License
[J-Interop library]	All products	Used to connect to Microsoft COM/.Net API API	(3) statically linked;	LGPL 3.0
[Antlr library]	All products	Antlr means "ANother Tool for Language Recognition". Antlr is a language tool that provides a framework for constructing recognizers, interpreters, compilers, and translators from grammatical descriptions containing actions	(5) bundled or distributed	BSD
[ASM framework]	All products	ASM is an all purpose Java bytecode manipulation and analysis framework	(5) bundled or distributed	http://asm.ow2.org/license.html
[HyperSQL]	All products	Used as an Embedded Database	(5) bundled or distributed	http://hsqldb.org/web/hsqldbLicense.html
[CSVReader]	All products	Used to reach CSV file	(3) statically linked;	BSD
